EXPERIENCE

Full Stack Developer

Jan 2020 - Present

[BP Processing](#) | Rochester NY

- Full stack developer for an enterprise level SaaS application to help others manage their dropshipping business
- Worked with influencers in the space on what solutions to create
- Built using Spring boot and Angular 7 with a responsive design
- Uses multiple different third party Api's

Key Accomplishments:

- Helps users move from messy excel sheets to an online app that keeps them and their employees organized
- Rehailed the eBay message inbox into an organized ticket management system
- Generates store specific reports and monthly profit reports to help users easily understand their key business stats

Software developer, Dropshipping business

2018 - Present

Space Capital Management | Rochester, NY

- Built software to automate and run an [eBay](#) dropshipping business
- Utilized a microservice architecture to manage, scale and reduce the risk of the business
- Analyzed business risks and made solutions to hedge against them
- Made key changes to offer an edge against the rest of the market

Key Accomplishments:

- Over \$1M in sales and more than 10,000 orders all managed by internal software
- Over 2,000 happy customers
- Nearly 100% uptime for all core services that manage the store
- Made simple software optimizations that increased store traffic by 50%

Freelance work

2018-2019

[Upwork](#) | Remote

- Worked with a variety of clients to help them solve problems in both the short and long term
- Wide variety of work from simple data scraping to back end Java development for a medium sized SaaS company
- Worked with other developers to create scraping solutions

SKILLS

Java, Spring Boot | HTML, CSS, Javascript, Angular, AngularJS | MongoDB | Linux, Ubuntu | Git
